

## BLUECHIP HIGH GROWTH LOW VALUATION STRATEGY

This is a Multi cap strategy which has quality Large, Mid & Small Cap Stocks from Nifty Total Market 750 index with high Sales & Profit growth and low valuation.

### METHODOLOGY

Multi-factor investing is an investment strategy where you build and manage a portfolio based on multiple factors. Instead of relying on just one style—like “value investing” or “growth investing”—you blend several factors to improve diversification and potentially enhance risk-adjusted returns.

#### Key Factors Commonly Used

1. Value – Stocks trading at low prices relative to fundamentals-like P/E ratio, Future P/E, TTM PEG, Future PEG
2. Momentum – Stocks with strong recent performance tend to continue doing well
3. Quality – Stocks with strong balance sheets, stable earnings, and good profitability.
4. Market Share – Stocks are continuously increasing market share with high sales growth
5. Smart Money – Domestic and Foreign institutional Investors are continuously buying the stocks
6. Basket – NIFTY TOTAL MARKET (top 750 stocks)

#### How It Works:

Portfolio Construction: Stocks are screened and ranked according to those factor scores and weighted equally

Diversification: By blending multiple factors, the strategy reduces the risk that any single factor underperforms for too long.

Market Cap Category – <b>Nifty Total Market 750 stocks</b>	Average Sales Growth YoY – <b>35.30</b>
No. of Sectors & Subgroups – <b>9 &amp; 21</b>	Average Profit Growth YoY - <b>53.89</b>
